SUMMARY

Software Engineer experienced in building high-performance web applications using JavaScript, React.js, Node.js, and Java. Currently contributing to enterprise-grade backend and full-stack systems at American Express. Skilled in REST APIs and databases including PostgreSQL, MySQL, and MongoDB. Strong foundation in data structures, OOP, and Agile development, with an interest in Gen AI and scalable system design.

EXPERIENCE

American Express

Jan 2026 – Present

Enterprise Technology Trainee

- Contributing to enterprise-grade web application development using React.js (internal OneApp wrapper framework) and Java (OneData backend framework) and Vert.x.
- Developing and maintaining scalable backend microservices using Java, REST APIs, JSON and PostgreSQL, focusing on performance optimization and clean architecture.
- Working on Gen AI initiatives, exploring AI-driven automation and intelligent data processing solutions for internal business use cases.
- Following best practices in code quality, version control, and enterprise development standards within a large-scale financial system.
- Gaining hands-on exposure to secure coding practices and scalable system design in a high-availability production environment.
- Collaborating in an Agile/Scrum environment, actively participating in sprint planning, stand-ups, and retrospectives using Jira.

medml.ai

Aug 2025 – Dec 2025

Software Development Engineer

- Engineered the medml.ai product website using React.js and JavaScript, developing scalable and reusable components to improve UI responsiveness, maintainability, and contribute to a 30% increase in new user acquisition.
- Designed and implemented a data management system for employee insurance records, enabling efficient storage, retrieval, and structured data handling while optimizing backend data processing pipelines to reduce processing time by 25% and improve overall platform efficiency.
- Built Gen AI-driven data mapping and analytics to deliver real-time insurance insights, improving decision-making.

PROJECTS

Resume Builder [\[Link\]](#)

- Built a component-based React.js application with drag-and-drop functionality and dynamic state management.
- Integrated client-side PDF generation and local storage persistence to ensure reliability and seamless UX.

Social Media Platform [\[Link\]](#)

- Developed a full-stack distributed web application using React.js, Node.js, and MongoDB.
- Designed REST APIs and database schemas supporting authentication, posting, and scalable user interactions.
- Implemented modular backend architecture to support maintainability and future feature expansion.

ACCOMPLISHMENTS & CERTIFICATIONS

- Achieved a Global Rank of 248 in CodeChef Starter 155 and Global Rank 9 in CodeChef Starter 156 (2024).
- 4-star rating on CodeChef (Max Rating: 1930) – ranking among the top 1% of Indian active users.
- Fundamentals of Networking – Cisco Networking Academy (issued Aug 2024).

SKILLS

- Programming Languages:** JavaScript, Python, C, C++
- Full-Stack Development:** React.js, Node.js, Express.js
- Backend Fundamentals:** REST APIs, JSON, Scalable Web Services.
- Databases:** MySQL (SQL), MongoDB.
- Engineering Practices:** Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks.
- Workflow & Tools:** Git/GitHub, Postman, Docker, VS Code, Agile, Jira, Rally.

EDUCATION

Arya College of Engineering and IT, Jaipur (Affiliated to Rajasthan Technical University (RTU), Kota.) 2021–2025
Bachelor of Technology, Electronics and Communication Engineering **CGPA: 9.14/10**
